Wolfgang Truong

Phone: 760-835-6041   Wolfgangtruong.code@gmail.com   LinkedIn   Github

SKILLS

Ruby, Rails, React, React-Native, Redux, SQL, Mongo, HTML, CSS/SASS, JavaScript, jQuery

PROJECTS

Netbrary | *(Express, react, Nodejs, CSS, Javascript)*   live | **github**
- Implemented an external API to my backend server returning movie/tv data when a user requests it.
- Optimizing user experience, using both application state and local state to refresh components seamlessly.
- Refactored by storing data from API in server cache, allowing for quickier data retrieval, and bypassing the API's limit
- With the use of flexbox, I created a UI that most users are familiar with.

Devconnector | *(Mongo, Express, React, Nodejs, CSS, JavaScript)*   live | **github**
- Using mlabs for my mongoDB, I created a social media for developers.
- Users are able to display Github projects(via API calls), show experience and education.
- Used JWT, Bcrypt, and passport to authenticate users, create user sessions and check permissions.

Dataworks | *(ruby, CSS, JavaScript, SQL, HTML)*   live | **github**
- This application is mainly about functionality, it displays website usage and visitor statistics of a user's registered sites, supplying the scripts for a developer to add to third party code.
- Utilized the CORS protocol allowing third party sites to request cross-site in a controlled manner, without opening up security vulnerabilities.
- Used Chart.js to display websites statistics: visits, clicks and other useful information.
- Authentication system using devise, and pundit.

EDUCATION

Full Stack Developer - Bloc, , San Francisco , 2017- 2019
Immersive software development course that focuses on full stack web development

Marketing - San Francisco State University, San Francisco, 2014- 2016
AA- Business Administration - College of the Desert, *Palm Desert, 2010- 2013*

EXPERIENCE

Open-Source Contributor/ Software Developer
Buttercup   Nov 2018 - PRESENT
- Give it a try! Get it in your app store, chrome extension, or desktop.
- Owned over a dozen of critical issues and resolve bugs that caused unwanted app behavior
- Worked with electron, react, and react-native to create or upgrade our intuitive user friendly interfaces.
- Continually improving the app, by testing and reporting bugs to be fixed by the community.

Server
The Cheesecake Factory   July 2015 - Feb 2019
- Trained 10+ servers on how to follow the company's service standards, as well as how to use our POS system.
- Implemented the newest standards that were determined at quarterly trainer meetings in order to improve both employee and guest experience.
